

QUIET QUILT PORTABLE SOUNDPROOF ENCLOSURE

PORTABLE SOUND BLANKET ENCLOSURE INSTALLATION INSTRUCTIONS

RECEIVING AND HANDLING

Sound blankets should be stored in a dry/controlled area.

INSTALLATION TOOLS

- The entire assembly slip-fits together without tools.
- Side baffles and view windows are pre-sewn into the walls of the Quiet Quilt enclosure. The roof and roof baffle require additional install steps.

HOW TO INSTALL

1. The pre-welded base plate and casters will be the base of the portable enclosure. Slip fit the steel frame to form the 3-sided base.
2. Slide (4) steel frame pieces into the base, so that they point towards the ceiling.
3. Slide the 3-sided top into the top of the (4) steel frame pieces.
4. Hang Quiet Quilt Soundproof Blankets from the frame with zip ties.
5. Seal overlap of the sound blankets at Velcro edges with 2" of overlap.
6. Cut zip ties.
7. Seriously, that's it. Get a second 3-sided enclosure to combine and create a 4-sided enclosure.

(see next page for expanded diagram of components)

This portable enclosure should be put together by two people. During the install, you and your install buddy may wonder if it's TOO easy and that you might've done something wrong. You didn't. Enjoy the extra free time!
