SOUND LOCK SOUNDPROOF DOOR HANDLESETS

SPEC SHEET

SECURY AUTOMATIC DOOR LOCK

THE SECURY AUTOMATIC DOOR LOCK

European technology in a North American lock

By simply closing the door, the upper and lower $\frac{3}{4}$ " (20mm) latches will instantly engage

By turning the key from the outside or the knob from the inside, the lock engages the 1" central deadbolt and block. The top and bottom latches to become a 3-deadbolt locking system

THE ADVANTAGES

- 20mm tempered steel latched engage behind the strike-plate and prevent the door from warping
- No lifting of the handle to engage locking points
- 90 degree thumbturn to engage deadbolt function
- The tapered latched always engage the keepers upon closing the door
- Reduce door warpage
- Better weather sealing and soundproofing performance
- More security
- The top and bottom locking points offer several benefits
- High grade 16mm stainless steel faceplate for higher corrosion resistance
- Radiused ends on faceplate for a clean look and easy installation
- Available for standard and 8 foot doors in 45, 50, and 60mm backsets
- Can be fitted with Ferco handle trim sets
